

Polyethylene Stock Troughs

These troughs are made from 100% High Density PE Material light weight however extremely strong and 100% UV resistant. These troughs are NOT like rota-moulded troughs which use a weak low density Polyethylene. Poly troughs have been proven to keep water cooler in hot climates. They come with a 1" bsp inlet and a 1" philmac high flow high pressure valve rates up to 1200kpa.

Product code	Description	List \$ Each
